

Goals and Objectives for _____

School Year and Age _____

English

To continue to improve reading, grammar and composition skills. This will be accomplished through the utilization of materials such as fiction and non-fiction literature, audio books, movies, written and/or oral reports, and varying curricula.

Math

To complete mathematical curriculum at appropriate grade level, use learned skills in daily life applications and master new concepts as they are introduced. Text books, free play, board and card games as well as live transactions will be incorporated.

Science

To continue to introduce new concepts and master these through reading, observation, journaling and experimentation. Museums, nature centers and nature studies will be enjoyed throughout the year.

Social Studies

Many subjects will be covered, including but not limited to geography, history, cultural studies and civics. This will be accomplished through literature, mapping activities, field trips, arts and crafts, exploring native recipes and constructing timelines.

Health, Safety and Physical Education

Regular opportunities for physical activity will be provided. Student will also participate in organized sports and hobbies. Topics such as health, nutrition and physical development will be covered as appropriate for age level. Fire safety and drug awareness will also be covered.

Arts and Humanities

Student will have the opportunity to pursue interests in art, music, drama and/or language. A variety of media, tools and techniques will be used for self-expression. Concerts, art shows, plays and more will be experienced.

Enrichment

Student will have ample time and encouragement to explore their interests. Extracurricular activities such as co-op, youth group and group sports may be utilized.
